WATER SAMPLES.

Symbol: HSA:JHM:krw

I am enclosing the results of the samples we discussed with all the data that we have. We hope by the time the soluble portions are complete that we will have data on the location of the unidentified samples. The first three columns are sample numbers -- the first HASL, the second WDL, and the third a field identification. On later pages the latter is sometimes displaced and the depth in meters is included. For example, HASL 3083 was the 10 meter sample at the location described.

Enclosure:

1. Photostatic copy of results identified "Tewa - Particulate"
