Log No. 52-3330

Copy No. 1

404151

17 December 1952

MEMORANDUM TO: Chairman, Committee on Atomic Energy

SUBJECT: Future Test Guidance After Review of IVY

Reference: (a) AE 224/2, Memo to AR, ES, GG, MS, AFSWP, Military Departments, MLC, Div. of Military Application, AEC--subj: "Arrangements for RDB Review of Test IVY, Future Test Guidance, and Review of Outline Plan for CASTLE," dtd 12 Dec 1952. (Log No. 52-3294)

1. By reference (a), this Committee was advised of the scheduled meeting of the Committee on Atomic Energy at which time it would review test IVY, prepare future test guidance, and review the outlined plan for test CASTLE.

2. Because of the short notice of this meeting and previous commitments, Dr. Grinter, this Committee's representative, found it impossible to attend.

3. Members of this Staff, however, have attended the preliminary meeting at which the draft form of the guidance, principally for test CASTLE, was modified for presentation to the Committee on Atomic Energy.

4. The Staff of this Committee concurs with the draft guidance as it was modified for presentation to your Committee.
