Dear Mr. Strauss:

Your letter of May 28, 1958 stated that the Commission has approved the declassification of the information listed below concerning shot PINON of Operation HARDTACK and requested the comments of the Department of Defense with respect to these declassification actions:

- a. The location and schedule and actual time of shot.
- b. The device to be tested is contained in a cylindrical container about 5 feet in diameter and 12 feet long, which will weigh about 3 tons including the contents. Also, the center of gravity insofar as it may be revealed by weighing under each of the four corners of the cradle.
- c. The bomb fraction tracer will be 20 tons of uranium (isotopic composition will remain classified).
- d. The total yield as measured by fireball photography and the necessary photography. (Only the predicted range of yield will be announced in advance of the test.)
- e. Cloud samples as collected on filter paper and any information which might be derived from analyzing them without the use of any classified information.
- f. Fission yield as determined by radiochemistry at UCRL, Berkeley and the analytic procedures used in this determination. The participants will observe this determination and may actually assist in carrying out the analyses.
- g. Identification of the device being tested as a stockpile weapon.
