Mr. John Finley
U. S. Atomic Energy Commission
Washington, D. C.

Dear Mr. Finley:

It has been necessary to again revise the list of personnel for the Bikini-Eniwetok Survey for this coming summer. It was impossible for Mr. W. K. Crane to obtain leave from the Atomic Energy Commission office at Hanford to take part in the expedition so his name must be withdrawn and that of Mr. Paul J. Kellogg added to the list.

The specific data requested on the entire party will be found on an enclosed sheet, also a list of personnel, permanent address and their assignment for the present expedition.

We have asked for security clearances on the entire group and are obtaining information on the results of the medical examination of each member.

It will be necessary to have the Navy issue an ID Card to Mr. Kellogg. We assume that Mr. Tinker and Dr. St. John will be notified to procure their ID Cards in Hawaii. The balance of the group have obtained their cards from the local Navy Security Office.

Yours sincerely,

Lauren R. Donaldson
