Dr. Shields Warren, Director
Division of Biology and Medicine
U. S. Atomic Energy Commission
Washington 25, D. C.

August 6, 1948

FROM NMB-N

Dear Dr. Warren:

Enclosed are our reports of the Bering and Chukotka

The work on the Bering and Chukotka fields was completed in early August with the samples being returned to the laboratory for drying and preparation. The samples were prepared in the laboratory and will be available for the completion of the

period from July 21 to July 30 was spent at Eriwetok where we collected a number of samples. The results of the study of the samples collected during this period will be prepared and submitted to you. The samples collected at Eriwetok will be frozen, dried, and chemically preserved for continuing the study at our laboratory.

The coating of the activity contained in the samples is getting better and better and the results will be prepared and submitted to you.

The results of the study of the samples collected during this and previous years' expeditions will be a very mercurious task. It is hoped that you will visit our laboratory so that we may discuss the results of the study and its contribution to an understanding of the problem.
