NOTE TO
MILCOM
NUMBER

Memorandum for Report
Captain James S. Russell, USA
Donaldson Station - 1949
112869
R

40000003

April 18, 1949

Colonel Press pointed out that military air travel in the Pacific area was presently extremely restricted, and therefore it might be necessary to move the party by commercial air. It was further pointed out that DMA should have a fairly concise memorandum from the Division of Biology and Medicine as to dates, times, names of individuals, and facilities desired. Mr. Hinde agreed to provide this information. The availability of a Navy Helicopter officer to accompany the party was discussed, particularly that the characteristics and suitability were not too good.

Colonel Press asked if Captain Russell, US (USA) might not be called upon to provide an officer from his service. Mr. Jones pointed out that Mr. Russell had an aviator's license and that he had been previously involved in flying operations in the Pacific. He also stated that Captain Russell had a good record in flying. Mr. Hinde suggested that Captain Russell might be available to fly the party to the USA via air, and that he would be available in 100 or 120 days. He added that a written request be submitted to him (signature on 09-36). This was promised.

Mr. Hinde makes a notation
Attention: Dr. James S. Russell
Captain, USA
