Dr. Curt Ries
Dept. of Medicine
475 HSW

Dear Dr. Ries:

The Committee on Human Experimentation approved your project, "Survival and Sequestration of ⁵¹Cr-labeled Platelets and Granulocytes in Human Hematological Malignancies" based on the original application dated February 23, 1972 and the revised consent form submitted April 18, 1972.

The number assigned this protocol is 223401-0472. This number should be included on all correspondence concerning this protocol and it must appear on all patient consent forms (copies of the consent submitted April 18) to be signed and on all patient charts involved.

The expiration date of this approval is April 24, 1973. If your project is to continue beyond that date, please submit an update in advance for the Committee's re-appraisal. If this protocol is used in conjunction with any other human experimentation or if it is modified in any way it must be re-approved for those special circumstances. In addition, the Committee requests prompt notification of any complications which occur during any experimental procedure.

Sincerely,

Leslie L. Bennett, M.D.
Chairman
Committee on Human Experimentation
