Call to Conrad re American  
Service men on Rye Beach

Called Howell. Suggested exams. DOD didn't  
know how to get them through. Proposed ~~the~~ exams  
of people to be held at VA hospitals. Wrote letter to  
each serviceman, suggesting thyroid exams. Left  
Conrad's group out of it.

Report to Bob if some information is gained.

Calculated thyroid dose later. May be comparable to  
linguinal group.
