Bill Burr: It seems to me we need to home in on this problem rather sharply and confront the situation of whether we continue or not and come to a signed agreement with whomever needs to be signed on as to what we will and won't do and the conditions under which we will do it. If our people continue to get harassed there then we should put our position on the line to pull out and let them go their own way --we don't need a continuing problem.
