SCHEDULE FOR THE LIKTANUR II

Reference is made to our letter of June 18, 1979 advising that we would like to schedule a users meeting on July 24, 1979, at Livermore, Calif. We have not as yet received replies from all users as to their interest in attending. The subcontract to extend the use of the Likatanur II for one year has been signed and only requires DOE approval. To fully utilize the vessel it is important that a scheduling meeting be held in the very near future. It is again requested that you advise, by return mail or by telephone, your intent to attend. Negative replies, if appropriate, are requested.

Sincerely,

W. J. Stanley
