Dear Gene:

The enclosed copy of a letter to Hugh Pratt might be of some use to you in your considerations re the Marshallese Program. It's a year old, but the basic problems haven't likely changed much in the interim. The thyroid problem especially hasn't changed much, and I find my position still aptly summarized in the middle of page 2, despite the disdain of the experts in Washington last May for such heretic notions.

Jaime comes tomorrow, and we are off Friday for 10 days in Keystone, Colorado. If you want to get together about this, maybe we could schedule some time to coincide with the Montreal hematology meetings, either before or after. I contacted Emilie and think I may have talked her into attending, despite the fact that she is now a psychology prof at the Sorbonne.

Warmest wishes to the family,

*don*
