SUBJECT: CYLINDERS AND CAGES USED AT OPERATION "GREENHOUSE"

SYMBOL: BMM:CLD

This date I received a phone call from B. N. Pinkham, Division of Supplies, Santa Fe Operations Office, to the effect that he had received an inquiry from a Lieutenant Victor King of N.M.R.I. who, at the suggestion of George LeRoy, was requesting that there be made available to him some 250 cylinders with liners, shutter housings, shutter plates, and release boxes, as well as some 50 mouse cage racks and cages. It was not clear from the telephone conversation for what purpose Lieutenant King wished this equipment, and more specifically, where he proposed to use it. Mr. Pinkham advised me that at the forward area there are currently 195 cylinders with liners, 196 shutter housings, and 168 shutter plates with release boxes, and that these are all under the jurisdiction of the Commander of the Task Force at Site E. He further stated that there were some 50 mouse cages racks, and 212 cages, under the jurisdiction of Holmes and Narver at the same site.

The question immediately comes up as to what is the best possible use to which this equipment may be put. Mr. Pinkham will write Lieutenant King, telling him that the Santa Fe Operations Office has no jurisdiction in the matter, and referring him to the Division of Biology and Medicine. Neither Pinkham or myself are actually clear as to whose property these items of equipment are. It is my recollection that they were originally Navy property, and were purchased with Navy funds.
