BIOLOGICAL PROJECTS FOR FUTURE TESTS

Pursuant to your suggestion, we have prepared an outline of projects to be carried on in connection with the fallout problem of future tests. Mr. German is preparing material on water contamination which will be included as a part of this outline. Provided these projects are considered favorably by the committee, considerable additional work will be required to expand these projects so that the logistics and personnel needs can be projected.

There is also attached a list of possible projects not concerned with fallout that we would like to have discussed by the NEM staff.

The various laboratories should probably be asked to submit proposals or suggestions. Possibly this would be an appropriate subject to bring up at the Laboratory Directors Meeting at Breckhaven next month.
