MEMORANDUM FOR THE DIRECTOR OF THE MILITARY APPLICATION DIVISION, ATOMIC ENERGY COMMISSION.

Subject: Funds for the Support of the 1949 "AEC Donaldson Survey."

1. Recent information received from the U. S. Naval Shipyard, Pearl Harbor indicates that the current modifications being accomplished on the LSIL 1091 at the request of Dr. Lauren R. Donaldson will necessitate an additional allocation of funds from the Atomic Energy Commission. Those funds remaining from the allocation made for the support of the 1948 expedition are being used to the maximum extent practicable.

2. It is requested that an additional allocation of \$10,000 be authorized for the support of the 1949 survey.
