Couriering Special Materials to Navy Medical Research Institute

SYMBOL:

N-4

Ogden Johnson is scheduled to depart Los Alamos at 11:00 AM Monday, June 4 with three packages of special Greenhouse materials. These packages weigh approximately 85 pounds, 85 pounds and 55 pounds, and contain pathological specimens sent here from Eniwetok in connection with Operation Greenhouse. The material was processed here and is scheduled to be sent to the Navy Medical Research Institute for further studies. The value of these specimens is sufficiently great that we feel it is necessary that they be accompanied by a courier and hand delivered to Commander John Tullis at the Institute.

Please do any necessary processing to insure Ogden's departure on schedule and the safe delivery of this material to the proper person.
