Dear Dr. Upton:

The paper entitled "Experimental Studies on the Late Effects of Nuclear Detonation" by Drs. Furth, Upton, Christenberry, Benedict, and Moshman, which you sent to Dr. Ralph Carlisle Smith for review, has been referred to us as a matter pertaining to this office. We have reviewed the paper and have determined that it does not contain Restricted Data as defined in the Atomic Energy Act of 1946. Hence, we have no objection to its unclassified presentation before the Radiological Society of North America meeting in Chicago on December 15, 1953.

Very truly yours,
