

Tentative Program
of the

RESEARCH CONFERENCE ON EFFECTS OF RADIATION AT THE CELLULAR AND PHYSIOLOGICAL LEVEL

to be held in Oak Ridge

April 12-14, 1951

Sponsored by

The Biology Division, Oak Ridge National Laboratory and the Atomic Energy Commission

* * * *

Alexander L. Dounce, Medical School, University of Rochester - "Cell Structure and Enzyme Systems"

Albert L. Lehninger, Department of Surgery, University of Chicago - "Isolated Enzyme Systems"

Edgar J. Boell, Osborn Zoological Laboratory, Yale University - "Metabolism and Possible Implications in Connection with Radiation Effects"

Laurence R. Blinks, Hopkins Marine Station, Pacific Grove - "Osmotic Relations of Plant Cells" ?

Morton McCutcheon, McManes Laboratory of Pathology, School of Medicine, University of Pennsylvania - "Problems and Effects of Radiation on Endothelial Permeability"

Ludwig von Sallmann, Department of Ophthalmology, College of Physicians and Surgeons, Columbia University - "Effects of Radiation on Cytology of the Eye"

Arthur K. Parpart, Department of Biology, Princeton University - "The Physical Chemistry of Erythrocytes"

Charles W. Sheppard, Biology Division, Oak Ridge National Laboratory - "The Effects of Radiation on Erythrocytes"

David Nachmansohn, Department of Neurology, College of Physicians and Surgeons, Columbia University - "Relation of Radiation to Nerve Physiology"
