REMARKS:	<u>ops plan completed</u>	

W. J. Stanley
 Director
 Dept. of Energy
 Pacific Area Support Office
 P.O. Box 29939
 Honolulu, Hawaii 96820

Dear Bill:

With the loss of the LCU, we have modified our plans substantially to conduct part of our scientific program at Enewetak this next Jan-Feb. I now request that the four people named below, from LLL, be allowed access to Enewetak during the period 31 Jan-15 Feb. They will live in the Janet trailer with three people from the University of Hawaii for the entire period.

We plan groundwater sampling at all well sites on Janet, David and Fred. Air sampler will be run on Janet for the two weeks and some reef sampling will be conducted. Since we have a large number of well sites at Janet, we will require unlimited access on the island. A suitable vehicle, to carry our sampling gear and large volume water samples, should be available during the period while we are on Janet.

Our crew will arrive at Enewetak on 31 Jan. They will need that afternoon and the morning of the 1st to get our gear together from storage at Fred. They will require billets on Fred for the evening of 31 Jan. and boat support from the military on 1 Feb. in order to move all the equipment to Janet. In addition to our sampling gear we require on Janet:

1. Diesel fuel-sufficient to run generator to power the trailer for two weeks.
2. Food supplies for seven people for two weeks (four-LLL and three- U. of Hawaii).
3. 3-55 gal drums of 80 octane aviation gas (or if not available, regular gas) to power small generators that run air samplers.
4. Water truck-full on Janet.

If the water truck, diesel and gas were available on Janet prior to the arrival of the scientific personnel it would be very helpful.

The personnel listed below will depart San Francisco on 30 Jan. and require hotel reservations and a vehicle in Hono for that evening and reservations on the 31 Jan. MAC flight to Enewetak.

<u>Name</u>	<u>Social Security</u>	<u>Clearance</u>
Kai Wong*		
Rod Eagle		
Gale Holladay		
James L Brunk		
*Chief of Party		

Ken Marsh, _____, will serve as an alternate if any of the above named individuals cannot make the trip. At the present time Rod Eagle is in the hospital with an infected elbow. I anticipate he will be in good shape by the end of January but I cannot take the chance of having to operate the program with only three people. Therefore, I request that Ken Marsh be processed and then if and when necessary, cancel his orders.

All LLL people on this phase of the program will depart Enewetak on the 15 Feb. MAC flight to Hono. We may hand carry frozen material back to Hono, if that phase of the program is successful, and will require someone to meet the return flight to insure the frozen material gets to cold storage. The returning personnel would like hotel reservations at the Holiday Inn for the evening of 15 Feb. The return plane reservations will be made through our office. Thank you for your attention to these matters.

Yours Truly,

Victor E. Noshkin
Environmental Sciences Division
