Mr. Joseph W. Merrill
 Project Engineer

FULL BODY COUNT FACILITY AT BIKINI ATOLL

I have just received the enclosed letter from Dr. Conard concurring in the plans for the subject facility. You will note he has asked that a work bench be added along the 20-foot wall opposite the showers.

I concur in all the requests made by Dr. Conard in his letter of July 9, 1969. Please arrange with Holmes & Narver to have them carried out as promptly and as economically as feasible. As you are aware, costs connected with this work will be paid for by the AEC and should be charged to other than the Bikini Cleanup Project.

Please keep the Commander, JTG 8.8, fully advised regarding this project.
