FOLDER ENIWETOK RADIOLOGICAL SURVEY 6/72-4/76

CHANGES TO PLANNING AND OPERATIONS DIRECTIVE (NVO-121)  
1972 ENIWETOK ATOLL RADIOLOGICAL SURVEY

1. Title of I.B. on Page 1, change to read: "Interagency Arrangements".
2. Appendix A, Page 2, Organization, Item 2, change to read as follows:

"2. The Division of Operational Safety (DOS) will share responsibility for planning the survey and will provide the coordination of these plans and their extension during the survey with the Assistant General Manager for Environmental Safety (AGMES). DOS will also provide information on the survey to EPA staff at the Washington level upon request. DOS will review and evaluate all data and assessments relevant to the feasibility of various cleanup methods and methods for disposal of hazardous materials, and will make recommendations on requirements, guidelines, and environmental and health protection standards to be employed during cleanup operations."

3. Appendix A, Page 3, Figure 1, replace with the attached figure.
4. General Comment:

A comprehensive safety plan has not been included as part of this document in view of the fact that each participating organization or agency is responsible for the safety of its own participating personnel. It is noted also that the site is a DOD operating location with overall site safety responsibility vested in the Site Manager.
