Dr. Charles L. Dunham
Chief, Medical Branch
Division of Biology and Medicine
Atomic Energy Commission
Washington 25, D. C.

Dear Church ~~Doctor Dunham~~:

This is in reply to your letter of 17 July 1952 regarding the ac-
cessioning of Operation Greenhouse pathologic material. The accession-
ing of this material has been started. As noted previously, all classi-
fied data pertaining to these specimens will continue to be treated as
such until directed otherwise.

Permission is ^{being} requested, however, to include the estimated dosage
of ionizing radiation received by the animals with these materials.
This would considerably enhance the value of these materials for study
purposes. No other classified information would be included, making it
impossible for anyone studying these materials to correlate dose and
distance.

Yours very truly,

Frenchy
