Dear Dr. Dunham:

This is to confirm the recent telephone conversation between yourself and Cdr. J. J. Fee, of the Secretariat, Committee on Atomic Energy, concerning a briefing for the Research and Development Board on the results of Operation GREENHOUSE. It is understood that you have kindly agreed to present to the members of the Board at their regular meeting on 20 June 1951, a ten or fifteen minute summary on the nature of preliminary results of the bio-medical test program at Operation GREENHOUSE.

Your presentation will be one of three. The others are to be made by General McCormack on the weapons tests, and Mr. Sherwood Smith, AFSWP, on the structures tests. The program for the briefings is scheduled for 1320, 20 June 1951 in Room 3E-1060.

The Board is grateful for your willingness to bring the members up to date on results of those portions of the recent atomic weapons tests with which you were intimately concerned.

Sincerely yours,
