We have employed Dames & Moore as soil consultants for both Eniwetok and Bikini atolls.

All of their productive work is under the supervision of Mr. LeRoy Crandall and is done at the 2333 West Third Street office.

Most of their employees at the Third Street office help with the physical tests on soil samples, and I do not believe that any portion of the soil testing will be above "Restricted-Security Information".

Work of a higher classification, which I think will never be higher than "Confidential-Security Information", will be done in private offices and only persons having "P" clearances will perform this work and those not having "P" clearance will not have access to the data.

Any work having a classification above "Confidential-Security Information", will be discussed with Mr. Crandall or Mr. Dames in our offices and the problem, as it leaves our office, will be worded so that "Confidential-Security Information" will be sufficient.

David L. Narver, Jr.
Chief Project Engineer
