Subject: DECONTAMINATION OF AREA ON SITE JANET

Dear Sir:

It is desired at this time that an area on Site Janet be decontaminated so that a 75' photo tower may be erected at this Site. This area to be decontaminated is to be located adjacent to GREENHOUSE Station #69 and is to be large enough that people and vehicles may operate around the base of this tower. Exact location of this area is to be decided in the field so that an area requiring a minimum of effort may be chosen. This office is to be informed of the coordinates of this location as soon as it is decided upon.

It is suggested that the background reading of this area be brought down at this time to a reading of about 10/mr hr so that within a few months personnel may work a normal week at this location.

For details of decontamination see memo on this subject from Alan Jones to AEC Resident Engineer, also see Mr. H. P. Schlicks on Site Elmer.

Very truly yours,

Robert H. Campbell  
J-6
