The following is quoted from the section on Surveys of Mr. L. Corman's outline of requirements for the Job 884 Completion Report:

"SURVEYS. This section will cover the over-all survey of both atolls. Previous surveys, where used, will be briefly discussed and the tying-in with the surveys of this operation indicated. Provide a chronological narrative of the survey work of this operation. Indicate number of parties used and unusual problems encountered. This discussion will cover all phases as topographic, hydrographic, construction layouts, establishment of horizontal networks, positioning of barges, etc., and will detail location of monuments or markers and their permanency.

Illustrations: Atoll control maps, table of geographic positions, plane coordinates of grids (similar to Volume I, Book 2, Chapter II of Ivy Report)."

Please prepare your discussion of surveying activity for submittal with the other engineering sections of the Completion Report. The starting date should be January 1, 1953.

David L. Narver, Jr.  
Chief Project Engineer
