R

David L. Narver, Jr. Surveys

February 2, 1953

Present Home Office thinking is the following for
combination of base line and triangulation surveys:

24
1/24

One man, namely, Glade Barry, will be sent TDY to
the Jobsite to handle physical field operation of
the base line and triangulation.

The calibrated tapes will arrive at the Jobsite
around Mid-February. About March 1, we will send
Glade Barry to the Jobsite, unless it indicates
some other scheme of operation.
