RESEARCH IN MEDICINE

Fellowships

Under the following program initial awards were made to 14 students in the postdoctoral medical sciences, 1 in the post-doctoral biological sciences, and 2 in the predoctoral biological sciences.

Ventilation Studies

NYBC's Medical Division in May determined the air contamination levels for various instances at the MIT Laboratories, the Middlesex Warehouse, and the plants of the Beryllium Corporation, Harsco Chemical Company, and Inlands Saw and Steel Company. Plans were developed for exhaust hoods, enclosures, and rates of air exhaustion believed adequate to reduce the concentration of these contaminants to a factor of 10.

Disaster Plans

In cooperation with the security and production staffs, NYBC Medical Division began working with NYBC contractors on coordinated plans for coping with disasters such as fire, flood, earthquake, etc.

Oak Ridge Institute of Nuclear Studies

The contract completed with OHSU contemplates a cooperative program with Oak Ridge Institute of Nuclear Studies for research with radioactive materials in the treatment of malignant diseases. The program will involve the use of OHSU's laboratory facilities and 10 to 30 beds at the Oak Ridge Hospital.

University of California Medical Center

NYBC authorized for the research program of the University of California Medical Center the purchase of a building to be constructed and maintained by it. The total cost of the project, including associated laboratories and animal quarters, will be approximately \$450,000.
