Subject: Bibliography materials on file at DASIAC which may be useful in preparing the Environmental Impact Statement for the Eniwetok Cleanup and Rehabilitation Program.

Dear Vic:

Enclosed is a special bibliography of selected documents from the DASIAC environmental data files that pertain to Eniwetok. It is anticipated that this bibliography may be useful to DNA and to whomever prepares the Environmental Impact Statement for the Eniwetok Cleanup and Rehabilitation Program.

The bibliography is organized as follows:

	<u>Refers to</u> <u>Section*</u>
Table 1 lists references which describe the islands, islanders, and their history and/or their social systems.	3b, 3c
Table 2 lists references which describe the impact which testing has had, giving particular attention to radiological effects.	3d
Table 3 lists references which may be particularly pertinent in planning the restoration and cleanup program.	3d, 3e, 4a, 4b and ecological considerations

Some references appear in more than one table. Within each table, references are presented in chronological sequence according to date.

\*Refers to Section of outline of Draft Environmental Impact Statement in Memo from HQ DNA; Subject: Environmental Statement-Eniwetok Cleanup, dated 4 December 1972.

File Requisitions

130503 DASIAC con Gen

Initials: \_\_\_\_\_

Date: \_\_\_\_\_

In addition to the above, there are also many DASIAC documents such as weapon test reports and PORs related to specific tests conducted on Eniwetok Atoll. For example, the REDWING series of events has over 200 references in DASIAC. A random check of these documents indicates that they are not particularly useful for preparation of impact statements; therefore, such references have not been included in this bibliography.

Additional environmental materials are being added routinely to the DASIAC file; therefore it is planned that the enclosed bibliography will be updated.

Very truly yours,

W. W. Chan  
Manager-DASIAC
