4. PROJECT GABRIEL

With reference to discussion at Meeting 565, Mr. Murray said he felt it important that the report on Project Gabriel be revised and brought up to date as soon as possible. Dr. Warren pointed out that data obtained at the recent RANGER and GREENHOUSE tests would soon be available and he suggested that submission of a full report be deferred pending their analysis and that an interim re-evaluation be made in about three weeks. After further discussion, the Commission:

- a. NOTED that the staff would undertake a re-evaluation of Project Gabriel, regarding bomb debris hazards, based on the most current data and submit a definitive report for the information of the Commission on about September 1; and
- b. NOTED that an interim re-evaluation of Project GABRIEL would be furnished the Commission as soon as possible.
