6. Joint Committee and the Test Program

25th
AEC-MLC
Meeting
2-18-48

Mr. Lilienthal stated that the Commission had met recently with the Joint Committee to discuss the forthcoming test program. Subsequently the Commission had decided that it was essential to inform the Joint Committee at an early date of the firing dates for the test program, in order that observers from the Joint Committee might make their arrangements for attendance. The Commission expected to specify a range of days within a given month rather than an exact date.
