69th AEC-MLC 2. STATUS OF THE THERMONUCLEAR PROGRAM
 Conference
 6-24-52

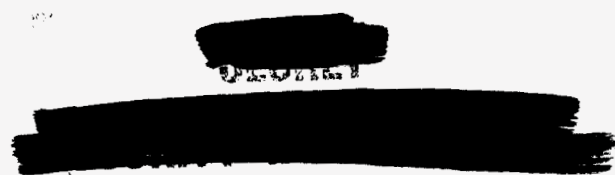

Dr. Bradbury reported on the status of the thermonuclear work at Los Alamos. With the aid of charts and a model he described the device to be tested at IVY and commented on the relations of this test to the ALARM CLOCK device.

The problem of emergency capability was discussed. Mr. LeBaron commented that the thermonuclear work at Los Alamos was proceeding extremely well. Admiral Withington added that he did not believe it could have gone any faster with the priorities for men and materials of the Manhattan Engineer District.
