6. Presidential Approval of Production Schedule and Future Tests

Mr. Lilienthal stated that the AEC production schedule for 1949 had been presented to the President by the Commission and the Secretary of Defense. The President took the matter under advisement.

There followed a general discussion of actions in connection with the 1951 atomic bomb tests. It was generally agreed that formal approval in principle by the President would be required on the scope and the approximate date of the test. Mr. Lilienthal stated that the Commission would take the lead in securing any necessary State Department concurrence in the time of the next tests, and in the preparation of a joint communication from the Chairman, AEC, and the Secretary of Defense, to the President.
