Subject Radiation Studies Training Program
for Marshall Islands

Here is a copy of a telex from DOE about the training program I talked to you about in June. Also enclosed is a copy of draft notes I will use at the August 4 meeting. Can you review this and provide additional information for me to use relative to your participation in the program? Please telephone your comments to my office (375-2421). Thanks.

From John Hébert *JH*

Subject Marshall Islands Risk Communication Follow-on

During a brief meeting with Bill Bair on 6/3/80, we discussed possible HARC involvement in a proposed DOE-EV sponsored program to educate Marshall Islanders on radiation risks. This program would be a follow-on to the PNL-led effort last year to communicate risk to people being re-established at Eniwetok. That effort was well-received.

This fiscal year, Bill hopes to get some program planning funds to lay out a course of action. HARC could provide assistance in this area. After some discussion with Stan Nealy, I was asked to contact you two and request that you jointly take the lead in exploring HARC's contribution to the planning effort.

Accordingly, could I ask you to contact Bill sometime during the week of June 22, 1980 (the next time he's in town) to start the process?

Bill has a notion of trying to train Marshallese people to do the educating/training. We both felt that some mechanism for assuring the effectiveness and accuracy of the information needs to be part of the plan.
