Subject Bikini Booklet

I've read through the booklet and have no major criticisms or suggestions for improvement. The numbering of paragraphs is a good idea, but some numbers are missing or in the wrong place.

P. 2	Definition for beta radiation. Delete "from the atom it comes from".
P. 3	The title for page 20 in the table of contents does not agree with that for page 20.
P. 4 Paragraph	Delete "are set apart [distinct] because they" . ]

3rd line
