

The Commission would like at this time to express its admiration for the efficient and harmonious way in which preparations for Operation SANDSTONE have been conducted by you and your scientific organization.

It would be difficult to overstate the importance of the outcome of these tests to the future of the Los Alamos Laboratory, the Atomic Energy Commission, and the security of this country.

Our best wishes for success go with you.

Sincerely yours,

UNITED STATES ATOMIC ENERGY COMMISSION

David E. Lilienthal
Chairman
